

# THE SMART HOME SYSTEM FROM THE EUROPEAN MARKET LEADER\*

homematic   
Smart Living, Simply Exciting.

# SMART HOME MADE SIMPLE

## **Easy** installation:

A large number of devices can be installed without any specialist knowledge or special skills. Simply get started with a Homematic IP Starter Set!

## **Easy** set-up:

Homematic IP is intuitively set up via a free smartphone app and comfortably controlled via app, remote control or voice commands (Amazon Alexa and Google Assistant).

## **Easy** expansion:

Flexible expansion from a range of over 100 Homematic IP devices.

# PRODUCTS<sup>1</sup>

## Access Point

Central element of the system. Connects the smartphone via the Homematic IP cloud with all Homematic IP devices. Connection to a standard router via LAN cable.

## Radiator Thermostat

Replaces conventional radiator thermostats and regulates the temperature according to individual needs.

## Window and Door Contact – optical

Detects opening or closing of windows and doors via the infrared-sensor.

## Motion detector – indoor

Detects movements inside the house and allows brightness- or time-dependent switching of lights. Can be used also for triggering alarms.

## Presence Sensor

Reliably recognizes the presence of people by detecting even smallest movements (e.g. hand movements on a keyboard).

## Key Ring Remote Control – alarm

Activates/deactivates alarm functions and switches lights on or off. Also available as product variant with four individually configurable buttons.

## Pluggable Switch/Pluggable Switch and Meter

Switches connected loads, e.g. electrical heaters or floor lamps, on and off and measures the energy consumption, power, voltage and current with the pluggable switch and meter.

# PRODUCTS<sup>1</sup>

## **Water Sensor**

Reliably detects moisture on different surfaces as well as water from 1.5 mm height.

## **Alarm Siren**

Warns about unauthorised entry and movements via loud acoustic signal and flashing device LED during activated alarm mode. Signal sounds and alarm duration can be individually defined.

## **Wall Thermostat with Humidity Sensor**

Measures temperature and humidity centrally in the room. Compares the setpoint and actual temperature for regulation of the radiator thermostats.

## **Motion Detector – outdoor**

Detects movements in outdoor areas. Flexible alignment of the lens enables ideal adjustment to the detection range.

## **Smoke Alarm with Q label**

Alarms are triggered in all connected rooms in case of life threatening smoke gas. Can also be used as a siren.

## **Remote Control – 8 buttons**

Remote control for universal use with four individually configurable pairs of buttons, e.g. for switching of lights. With labelling field at the back side of the device.

## **Wall-mount Remote Control – 2 buttons**

Switches the eco mode as well as lights on and off and serves as panic button within the security solution.

## **Wall-mount Remote Control – 6 buttons**

Three freely configurable pairs of buttons for switching of connected devices. Can be placed freely in the room thanks to battery operation and radio communication.
